

Jose Velazquez Saenz

Module 8.2 Assignment

Project Index:

The screenshot shows a web browser window with the address bar displaying 'localhost/App_08/index.jsp'. The page has a dark header bar with navigation icons and a 'Finish update' button. The main content area is white and contains the following sections:

CSD430 Movies Database Project

This project uses the CSD430 MySQL database and the jose_movies_data table. The table stores movie records with a primary key, title, genre, release year, director, and rating.

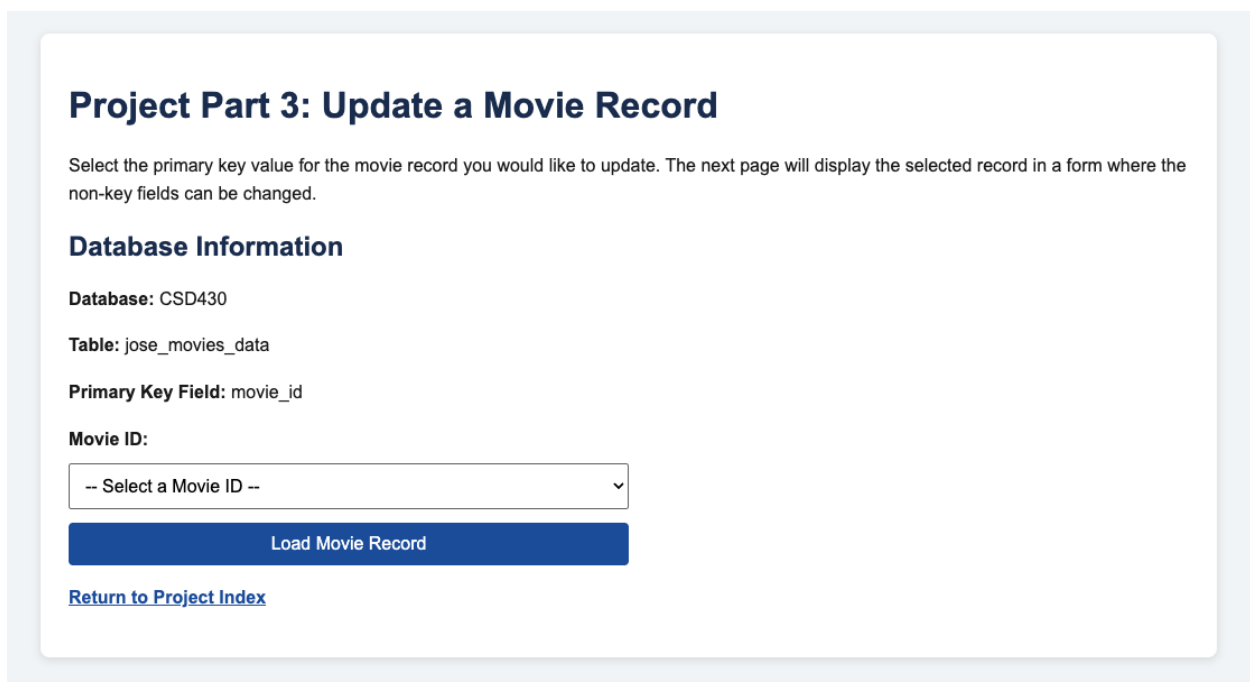

Module Links

- [Module 6: Select and Display One Movie Record](#)
- [Project Part 2: Add a New Movie Record](#)
- [Display All Movie Records](#)
- [Project Part 3: Update a Movie Record](#)

Project Files Included

The submission includes the original create, populate, and drop Java source files, the JavaBean source file, JSP pages, CSS file, and SQL setup files.

Update Movie Record:

The screenshot shows a web page titled 'Project Part 3: Update a Movie Record'. The page contains the following information:

Project Part 3: Update a Movie Record

Select the primary key value for the movie record you would like to update. The next page will display the selected record in a form where the non-key fields can be changed.

Database Information

Database: CSD430
Table: jose_movies_data
Primary Key Field: movie_id

Movie ID:

-- Select a Movie ID --

Update Movie:

Updated Movie Record

The selected movie record has been updated in the CSD430 database. The table below displays the updated record with each field in a separate column.

Record Description

This table shows one row from the jose_movies_data table. The movie_id field is the primary key, and the remaining fields describe the movie title, genre, release year, director, and rating.

movie_id INT Primary Key	title VARCHAR	genre VARCHAR	release_year INT	director VARCHAR	rating VARCHAR
11	Captain America: Civil War	Action	2016	Joe Russo	PG-13
